Education

Aditya Engineering College April 2026
Bachelor of Technology in Computer Science Engineering with Data Science (GPA: 7.54 / 10.00) surampalem,Andhra Pradesh
• **Relevant Coursework:** Computer Networks, Operating Systems, and DBMS, covering algorithms, networking, OS concepts, and database management. python..

Experience

Technical Hub June 2024 – July 2024
Cyber Security Trainee Kakinada,Andhra Pradesh
• Spearheaded weekly OpenVAS vulnerability scans across 8 VM lab environments, identifying and remediating 20+ critical security flaws including outdated services and weak credentials, resulting in 15% improvement in detection accuracy
• Championed HTTPS encryption implementation for 5 Apache servers through OpenSSL certificate management, reducing configuration errors by 20% in capstone project environments
• Spearheaded campus-wide 2FA adoption initiative that increased Google Authenticator deployment by 40% across student organizations, eliminating monthly phishing-related account compromises through tailored training materials
• Mastered network traffic analysis through 50+ Wireshark investigations and Splunk log reviews, achieving 92% lab completion rate while reducing incident triage time by 33% (45m → 30m per case)

Projects

Steganography Toolkit | *Python, Qt Framework, Cryptography*
• Developed multi-format steganography software supporting BMP/PNG images, WAV audio, and MP4 video files using Python
• Implemented LSB substitution and phase coding techniques with AES-256 encryption prior to data embedding
• Created Qt-based GUI with drag-and-drop functionality and real-time previews, serving 200+ users during beta testing
• Optimized performance by 20% through multiprocessing and memory-efficient algorithms for large file processing
• Conducted robustness testing against StegExpose and StegDetect tools, achieving 98% recovery accuracy

Adversarial Defense for Spam Detection | *PyTorch, TensorFlow, NLP, Cybersecurity*
• Designed spam detection system resistant to adversarial attacks using defensive distillation and gradient masking
• Reduced evasion attack success rates by 40% while maintaining 92% classification accuracy on adversarial samples
• Developed hybrid architecture combining BERT transformers with noise reduction preprocessing
• Implemented testing framework for 20+ attack vectors including FGSM, PGD, and Unicode injection
• Deployed SHAP-based monitoring pipeline that reduced false negatives by 35% with ;150ms inference latency

Technical Skills

Languages: bash,sql,excel,linux, python

Technologies: MetaSploit,Nmap,BurpSuite,pfsense,Nexus,Aircrack,Wifi Password Cracker

Concepts:TCP/IP, OSI Model, IDS/IPS, VPNs, Web Security, Authentication, Cryptography, Incident Response, Digital Forensics, Malware Analysis, Ethical Hacking, Penetration Testing.

Certifications

- **Certified Professional Ethical Hacker** – [Mile2] [↗](#) **CERTIFICATE ID :- 28078-173-873-6151**
- **Certified Cybersecurity Analyst** – [Mile2] [↗](#) **CERTIFICATE ID :- 28078-175-033-0606**
- **Ethical Hacker** – [Cisco Networking Academy] [↗](#)
- **CCNA v7: Introduction to Networks** – [Cisco Networking Academy] [↗](#)
- **Introduction to Cybersecurity** – [Cisco Networking Academy] [↗](#)
- **Ethical Hacking** – [NPTEL] [↗](#)
- **Introduction To Internet Of Things** – [NPTEL] [↗](#)

Achievements

National Service Scheme (NSS): Forged strong partnerships with three local NGOs, coordinating efforts to deliver educational workshops to 150+ underprivileged children, promoting literacy and academic success.
